TOPAZ Enterprise Software

Software Solutions Made Simple.

TOPAZ Enterprise is a suite of scalable internet software applications that can be integrated to meet your particular research management needs. The applications in the Enterprise suite are built from the ground up to share a single enterprise database and present consistent graphical interfaces to ensure cross-application collaboration, and superior user experiences.

Your return on investment is a streamlined operation, increased productivity, and high-quality information with *NO integration costs*.

Each Enterprise application can be easily integrated with other applications to create a variety of solutions suited to your particular needs.

Backed by a solid product roadmap and world-class professional services, TOPAZ Enterprise's integrated nature makes it an ideal end-to-end solution that you can build as you go and be confident that the TOPAZ applications you buy today will fit seamlessly with the ones you buy tomorrow.
